

**Division of Health Care Finance and Policy**  
**Claims Update – November 12, 2008**

**Topic:** Secondary Payer Edit Requirement – 837I claims

**Update:** The Division has identified an issue where an edit on the internal payer source code is not working correctly. Provision of this code is a requirement where Health Safety Net is the secondary payer. While many providers are already submitting this data correctly, the Division will be modifying this edit to be a “warning” only for the next 30 days to allow non compliant providers ample time to update their systems accordingly. As of December 15, 2008, the edit will be changed back to a “fatal” error for missing / incorrect data.
